

Tissue Culture *Chambers and Rooms*

Tissue Culture chambers and rooms are specifically designed to maximize research area and to provide uniform environmental conditions. They are ideal for tissue culture work and genetic experiments.

Knowledge Inside and Out

Expect to Grow

Accurate, easy to use controls drive successful research:

- Multi-tiered shelving units with individual upward airflow virtually eliminate condensation problems in petri dishes and test tubes
- Lighting levels from 100 to 200 $\mu\text{mole m}^{-2} \text{s}^{-1}$ @ 6" from the light canopy are typical
- Precise and responsive temperature and lighting control
- Optional humidity and CO₂ control

Tissue Culture BioRoom™

Tissue Culture Bigfoot™ Chamber

Expect to Know

Our BioChambers team will design and propose the best selection of chambers to maximize the growth area in your facility. Because we focus on solutions, you can expect growing success!

Our most popular series of products is found in research labs throughout the world. Bigfoot™ makes the best use of space. Bigfoot™ means more growth area....more experiments....more results

BioBuild™ maximizes your growth area. Pack them together like dominos, side by side and back to back.

BioRoom™ enables scientists to conduct multiple experiments concurrently. Available in standard, specialized, and convertible rooms.

A state-of-the-art, independent controller providing accurate control of light, temperature, airflow, humidity, CO₂, watering and other options:

- Instantly shows you the status of all your experiments from your own computer
- Allows you to view and access any individual chamber with a click of the mouse

Available with every chamber and room is a unique proprietary monitoring system including the following features:

- A network of sensors which monitor both building services and the critical parameters of your experiment
- Multiple avenues of communication to ensure a prompt response to a cell phone, pager, PDA or similar device
- Remote, secure access—from anywhere

Engineering Excellence

BioChambers, formerly operating as Enconair, has been providing tailor-made, premium growth chambers and rooms to bio scientists around the world for over 30 years. At BioChambers, we're engineered to lead.
