Expect to Grow

VNet Controller and software:

Latest stand-alone Ethernet controller for precise control of temperature, lighting, humidity, CO₂ and other parameters. Large storage capacity for data and schedules on compact flash. BioChambers technicians can access the controller to provide you with direct assistance and diagnostics. Available with both computer or LCD display.

Research Saver:

Proprietary monitoring system unique to the industry. A network of sensors monitors critical parameters of your experiment and building utility services. Avenues of communication include email, text messaging and building alarm systems to ensure a prompt response.

View both multi-chamber installations and individual chambers with the click of a mouse.

Expect to Know

Available with every chamber and room is a unique proprietary monitoring system including the following features:

- A network of sensors which monitor both building services and the critical parameters of your experiment
- Multiple avenues of communication to ensure a prompt response to a cell phone, pager, Blackberry® or similar device
- Remote, secure access—from anywhere

A state-of-the-art, independent controller providing accurate control of light, temperature, humidity and CO₂:

- Instantly shows you the status of all your experiments from your own computer
- Allows you to view and access any individual chamber with a click of the mouse

Our BioChambers team will design and propose the best selection of chambers to maximize the growth area in your facility. Because we focus on solutions, you can expect growing success!

Our most popular series of products is found in research labs throughout the world. Bigfoot™ makes the best use of space. Bigfoot™ means more growth area....more experiments....more results

BioBuild™ maximizes your growth area. Pack them together like dominos, side by side and back to back.

BioRoom™ enables scientists to conduct multiple experiments concurrently. Available in standard, specialized, and convertible rooms.

Engineering Excellence

BioChambers, formerly operating as Enconair, has been providing tailor-made, premium growth chambers and rooms to bio scientists around the world for over 30 years. At BioChambers, we're engineered to lead.
