Tall Plant growth chambers and rooms are specifically designed to provide maximum growth height and high lighting levels. They are ideal for experiments with cereal crops, shrubs, saplings and horticulture plants.

**Features:**

- 1.9m² (20ft²) of plant growth area
- 1550mm (61”) of growth height
- 1000µmoles/m²/s P.A.R. of lighting
- Ideal for cereal crops and other plants requiring high light intensities
- Barriered lighting with separate lamploft refrigeration & temperature control
- Maximum light intensities at all temperatures with lamploft temperature control
- Slide-out lamp drawer for easy lamp maintenance
BIGFOOT splits for easy access to your lab.

BIGFOOT 20ft²
Typical 15ft² chamber

FIT MORE CHAMBERS IN YOUR LAB!
There’s no need to provide space at chamber ends for service. BIGFOOT is serviced entirely from the front.

Quality product.
Excellent service.
Innovative designs.
INTRODUCTION

BioChambers’ plant growth chamber model TPCB-19 was specifically designed with a barriered lamploft in which lamp heat is isolated from the plant growth space and is independently temperature controlled, maximizing the light intensity at all chamber temperatures by maintaining a constant lamploft temperature. The chamber features a downward airflow design providing uniform conditions inside the chamber. BioChambers’ plant growth chambers provide tight uniform control of temperature, a balanced lighting spectrum using a mixture of fluorescent and halogen lamps, and adjustable airflow.

1.0 CONTROLLER

1.1 Controller Version: BioChambers VNET.
1.2 Interface: Fanless panel PC with a 305mm (12”) color touch screen.
1.3 Ethernet Connection: Remote secure access using a unique site specific webkey allowing the chambers/rooms to be connected to a facility supplied local area network (LAN)/internet.
1.4 Security: Multiple levels of password security for researchers, administrators, service technicians, and BioChambers’ factory technicians.
1.5 VNET Viewer: Instantly view the status of all your experiments. Single or multiple chambers/rooms can be remotely monitored and operated from a central location via use of the LAN/internet. VNET Viewer can be installed at up to three existing computer stations.
1.6 Schedule: Multi-line schedule can be created for temperature, lighting, and fan speed using the touch screen interface or remotely using the facility provided LAN/internet. Available options: humidity, carbon dioxide, auxiliary circuits primarily for automatic watering, light intensity, etc… can also be scheduled.
1.7 Multi-Day: Simulation of multi-day changing environmental conditions can be scheduled.
1.8 Ramping: Temperature ramping from setpoint to setpoint. Available options: humidity, carbon dioxide, and dimmable lighting can also be ramped.
1.9 Astronomical Clock: Researchers can produce photo-period schedules for locations worldwide by simply entering the latitude and longitude.
1.10 Graphing: Controlled parameters such as temperature and the following available options: humidity, carbon dioxide, and light intensity can be graphed to show setpoint versus actual conditions.
1.11 Research Data: Controller equipped with a compact flash memory card to store multiple schedules and logged data such as temperature, alarms, etc… Log rate and duration can be set by the user.
1.12 Data Export: Data can be exported to the researchers/administrators computer for further analysis.
1.13 Start-up: Provisions for chamber/room start-up delay in facilities with multiple chambers/rooms helping to reduce the initial inrush current after a power outage.
1.14 Alarms: Notification via e-mails sent to a cell phone or laptop PC, building alarm contacts connected to a facility supplied building security system, and on chamber/room audible alarm with red indicator light.
1.15 Service Data: Refrigeration system pressures and temperatures along with other service parameters are logged. Log rate and duration can be set independently of the research log.
1.16 Service Screen: Displays compressor discharge and suction pressures and temperatures, facility water supply and return temperatures, automatic setting temperature safety limits status, lamp hours, sensor calibration hours, temperature control valve position, and more.
1.17 Service: Two manual toggle switches with a 10 minute schedule bypass are provided for the service technician to place the chamber/room into full cooling or heating and all lights on or off. This enables faster and easier service work as the technician does not need to learn how to use the control system.
2.0 CONSTRUCTION

2.1 Exterior Dimensions: 2565mmW x 1040mmD x 2820mmH (101"W x 41"D x 111"H) assembled. Add 230mm (9") to the height to assemble the chamber (custom heights are available).

2.2 Assembly: Chamber splits at a height of 1980mm (78") for easy installation in the facility.

2.3 Interior Dimensions: 2490mmW x 760mmD (98"W x 30"D).

2.4 Growth Area: 1.90m² (20.4ft²).

2.5 Growth Height: 1740mm (68½") to the barrier, 1550mm (61") to the bottom of the air supply grille.

2.6 Growth Capacity: 2.9m³ (104ft³).

2.7 Interior: Pre-painted white smooth aluminum.

2.8 Exterior: Powder coated painted green aluminum.

2.9 Lamp Canopy: One 750mmD x 2445mmW (29½"D x 96¼"W) fixed height lamp canopy with a single pane acrylic barrier isolating the lamps from the growth area. Slide out canopy for easy servicing of the lamps. Independent temperature controlled cooling system for the lamploft.

2.10 Drain Pan: Constructed of stainless steel for superior corrosion resistance.

2.11 Insulation: 38mm (1½") CFC free, high-density expanded polystyrene.

2.12 Electronics: Filtered air blown into the control panel, providing cooling to the electronics and positive pressure in the control panel keeping dust out, extending the life of the electronics.

2.13 Service: Easy access from the front to electronics and mechanical components located on the roof of the chamber.

2.14 Instrument Ports: Two 50mm (2") with light tight covers.

2.15 Reach-In Doors: Two 840mmW x 1675mmH (33"W x 66"H) with light tight magnetic gaskets and self closing cam-lift hinges.

2.16 Observation Window: One 380mm x 280mm (15" x 11") dual pane glass window with light tight cover.

2.17 Control Panel: Display mounted on the center of the chamber when facing the doors.

2.18 Aisle/Vestibule: N.A.

3.0 TEMPERATURE

3.1 Ambient: Designed for a maximum ambient of 35°C.

3.2 Range: 4°C to 40°C all lights off, 10°C to 40°C all lights on (extended temperature options are available).

3.3 Control: PID control, +/-0.5°C at the aspirated sensor.

3.4 Temperature Limits: Automatically set when the researcher runs a schedule. One high/low and one lamp safety temperature limit sensor independent of the main temperature sensor.

3.5 Aspirator: Adjustable, aspirated, and shielded from the lights sensing of temperature.

3.6 Temperature Sensor: High precision fast responding thermistor sensor.

4.0 LIGHTING

4.1 Lighting: T5HO high light with energy efficient electronic ballasts (other lighting options are available).

4.2 Intensity: 1000µmoles/m²/s measured at 150mm (6") from the barrier at 20°C and averaged on a 150mm (6") grid.

4.3 Lamps: Combination of 1220mm (4ft) T5HO fluorescent lamps and halogen lamps.

4.4 Programming: Via VNET controller.

4.5 Lighting Levels: 4 Levels of fluorescent lighting and 4 levels of halogen lighting, total of 8 lighting levels.

4.6 Lamp Heat: Refrigeration system sized to remove all heat generated by the lights.

4.7 Lighting Relays: 100% solid state for increased reliability.
5.0 **REFRIGERATION**

5.1 **Condenser:** Self-contained water-cooled condenser (other options are available).

5.2 **Temperature Valve:** No maintenance electronic proportional hot gas bypass system for close temperature control and continuous compressor operation.

5.3 **Compressor:** Scroll compressor.

5.4 **Refrigerant:** HFC-404A.

5.5 **Evaporator:** Copper tube and aluminum fin construction.

5.6 **Refrigeration Analysis:** Compressor discharge and suction pressures as well as temperatures, and facility water supply and return temperatures are provided and logged for ease of service.

5.7 **Safety:** One suction pressure switch and one discharge pressure switch with a manual reset is provided on the refrigeration system to prevent short cycling and compressor burn out.

5.8 **Barriered Lamploft:** Plant growth area and barriered lamp-loft are each refrigerated by a separate and independent refrigeration system.

5.9 **Defrost Cycle:** N.A.

6.0 **AIR DISTRIBUTION**

6.1 **Air Flow:** Downward airflow in the growth area through an adjustable back wall supply grille.

6.2 **Fan Speed:** Adjustable from 60% to 100% (85% or higher recommended, temperature gradients increase at lower fan speeds). Fan speed can be programmed in the VNET controller enabling researchers to vary the airflow through the plants.

6.3 **Fresh Air:** Filtered fresh air with a manually adjustable vent: 1.7m³/min (60ft³/min).

7.0 **RESEARCH SAVER**

7.1 **Surge Protector:** Over voltage protection of the controller and control circuit from electrical surges.

7.2 **Uninterruptible Power Supply (UPS):** Protects the controller and control circuit from brown outs, surge conditions, and momentary loss of power.

7.3 **Power Phase Detector:** Loss of power phase alarm protects the compressor and other components.

7.4 **Factory Diagnostics:** Via a facility supplied LAN/internet connection a technician at the factory can access the chamber/room to analyze the mechanical, electrical, and control systems.

7.5 **Testing:** 100% assembled, tested and run-in at the factory before being disassembled for shipment to the site reducing on-site assembly time and disruptions.

7.6 **Quality Standard:** ISO 9001:2015 certified company.

8.0 **WARRANTY**

8.1 **Duration:** Two years parts and labor.

8.2 **Diagnostics:** Additional years three to five remote diagnostics service.

9.0 **ELECTRICAL**

9.1 **Service:** 120/208V/3-phase/60Hz/4 Wire + ground (50Hz option: 240/415V/3-phase/50Hz/4 Wire + ground). Electrical service to be provided by others (contact BioChambers for utility requirements).

9.2 **Electrical Safety:** Chamber/Room is CSA inspected (CE where applicable).

10.0 **INSTALLATION & CUSTOMER TRAINING**

10.1 **Manuals:** Controller manual, operation & maintenance manual, and electrical schematics provided.

10.2 **Training:** On-site training on the controller, electrical, and refrigeration system by a factory technician. (Extra charges may apply to chambers/rooms shipped outside of Canada or the U.S.A.)

10.3 **Installation:** Installation not included. Please consult with BioChambers for installation options.

11.0 **OTHER**

11.13.b **BENCHING & SHELVES**

11.13.1 **Wire Shelves:** Two 750mm x 1220mm (29½” x 48”) adjustable height powder coated white wire shelves.

11.13.2 **Height:** The height of the shelf must be subtracted from the growth height (item 2.5) and growth capacity (item 2.6).
Available Options

Biochambers Rooms and Chambers are available with a variety of options and accessories. If your research has specific requirements, BioChambers can outfit your equipment to meet your needs. These are just a few of the standard options Biochambers has available. Ask for more information.
BIOCHAMBERS CAN MANUFACTURE THIS PRODUCT AT CUSTOM HEIGHTS TO ACCOMMODATE CEILING OBSTRUCTIONS.

1. Control Panel
2. VNET View or VNET Touch Display
3. Door Opening 840 [33] x 1676 [66]
4. Fresh Air
5. Exhaust Air
6a. Chamber Refrigeration System
6b. Lamp Loft Refrigeration System
7. Instrument Ports
8. Ballasts
9. Viewing Window
10. Pull Out Lamp Canopy
11. N/A
12. Air Plenum

- Ethernet connection
- Purified water connection (if Humidity option selected)
- Electrical connection
- Ø1-1/8" Drain Location
- Chamber cooling water connections for condenser
- Lamp Loft cooling water connections for condenser
- Electrical line connections for air-cooled condenser (if option selected)

AIR FLOW

1740 [68-1/2] FLOOR TO BARRIER
1550 [61] FLOOR TO GRILLE

MINIMUM DOOR SWING
978 [38\(\frac{1}{2}\)]
